Database (My SQL)

HOBBIES

Music, Traveling, Reading, Writing, Net Surfing, Esports, Tech news, etc.

ABOUT ME

Recent CSE graduate who is really passionate and highly motivated team player and constantly finds ways to develop my professional skills.

Projects

Product Review Forum

Html, CSS, Bootstrap, MySQL, Php MVC model Laravel framework

Best Product BD is an online forum. It is not a typical e-commerce website; it is pretty much different and suitable for Asian country like Bangladesh. Here you can post your own review based on experience. These user-experiences are not bound to digital things, you can share and watch e-commerce experiences.
You can reach the desire e-commerce website to purchase your best valued and quality product.

PC Parts Comparison

Html, CSS, Bootstrap, MySQL, Php MVC model Laravel framework

Pc parts comparison is one of my dream projects. Sadly, it's not for the public yet.

Its function like best-deal finder among the tech e-commerce site of Bangladesh like Star Tech, Rayans, Techland etc. People can easily find the best price for the same parts from different tech-website for the product they selected. Also, a huge amount of resource to research to build a Desktop computer and a virtual pc builder.
Many of real build recommendation.

Restaurant Management System

It was University's 1st year project. It was possible because YouTube.

Java with Object oriented Programming knowledge.

EDUCATION

Bachelor of science in CSE (2021)

Daffodil International University
